TITOLO: The quarterly journal of pure and applied mathematics

Vol. X	Henry M. Jeffery	On conicoids referred to quadriplanar coordinates	1-22
	A. Cayley	Note on the discriminant of a binary quantic	23
	A. Cayley	On the quartic surfaces (*) $(U,V,W)^2 = 0$	24-34
	Chief Justice Cockle	Third chapter on coresolvents	35-52
	J.J. Walker	On the anharmonic-ratio sextic	53-57
	A. Cayley	On the double-sixers of a cubic surface	58-71
	William Walton	On a problem in the calculus of variation	72-78
	Rev. Percival Frost	On the direction of lines of curvature in the neighbourhood of an umbilicus	78-86
	William Walton	On the expression of a certain function in the form of a series	87-93
	C. Taylor	On some equivalent equations	93-96
	Henry M. Jeffery	On conicoids referred to four point tangential coordinates	97-109
	W.H.Besant	Note on the envelope of the pedal of a triangle	110-111
	A.Cayley	Note on mr. Frost's paper on the direction of lines and curvature in the neighbourhood of an umbilicus	111-113
	W. Esson	Axial coordinates	113-121
	William Walton	On a theorem on the resistance of fluids	122-124
	Rev. H.G.Day	Notes on geometrical conics	125-126
	James Warren	Note on a fundamental theorem in hydrodynamics	127-128
	John P. Taylor	Geometrical proof of M. Faure's and some kindred theories	129-132

	Martin Gardiner	Properties of quadrics having common intersection, and of quadrics inscribed in the same developable, (being an extension of chapter XVI of Chasle's conics)	132-147
	A. Cayley	On the geometrical interpretation of the covariants of a binary cubic	148-149

	Chief Justice Cockle	On the motion of fluids	150-161
	J.J. Walker	On the anharmonic-ratio sextic of a pair of conics	162-167
	William Walton	On a property of surfaces of the second degree	167-170
	Henry M. Jeffery	On centres of curves or surfaces and their polar and pole curves or surfaces	171-185
	W. H. Thompson	On magic squares	186-202
	R. Townsend	On the moment of inertia of a ring with respect to its axis of revolution	203-204
	Samuel Roberts	On the degree of the discriminant with respect to a parameter in certain cases	204-210
	W. Snow Burnside	On the invariants and covariants α, α, of a binary quartic, considered geometrically as a system of two ternary quadrics	211-218
	William Walton	A demonstration of the expression for the number of homogeneous products of n things of r dimensions	219-220
	Robert Stawell Ball	A problem in mechanics	220-228
	John Griffiths	Note on finding the degree of a certain locus connected with a triangle inscribed in a circle	229-230
	John Griffiths	On a property of the eight circles which can be drawn through the six points of intersection of three given circles	230-231
	Henry M. Jeffery	On cusps and points of inflexion on cuspidal points and lines of inflexion	232-238
	William Walton	On an equation of mixed differences	248-253

	W. Snow Burnside	On the invariants and covariants of a system of three conics	239-247
	William Walton	On a theorem in maxima and minima	253-263
	R. Townsend	On the nodal cones of quadrinodal cubics, and the Zomal conics of tetrazomal quartics	264-284
	Rev. J. Wolstenholme	On certain properties of confocal conics, and theorems derived therefrom	285-288
	James Cockle	On the motion of fluids	289-311

	J.J. Walker	Anharmonic properties of conics inscribed in a quadrilateral	317-320
	Henry M. Jeffery	On dual curvature and the duals of evolutes and involutes	321-344
	William Walton	On the solid of least resistance	344-356
	Rev. J. Wolstenholme	On a certain system of trigonometrical equations with applications to the porisms of two coaxal conics	356-368
	R. B. Hayward	An interpretation and proof of Lagrange's equations of motion referred to generalized coordinates	369-375
Vol. XI	William Walton	On the relation between the angular velocity of the instantaneous axis of a body revolving spontaneously about a fixed point, and on the axes of greatest and least mobility	1-15
	A. Cayley	On the quartic surfaces $(*)(U,V,W)^2 = 0$	16-25
	Andrew Frost	General solution and extension of the problem of the 15 school girls	26-37

	W. H. Besant	Mathematical notes	38-41
	Samuel Roberts	Note on a binary evectant form	42-47
	Percival Frost	Electro-dynamics:Ampere's theory of the solenoid	47-56
	C. Niven	Applications of a change of the dependent and independent variables	312-317
	Joseph Horner	On the algebra of magic squares	57-65
	Joseph Wolstenholme	Note to the article on porisms, quarterly journal, No. 30	66-67
	William Walton	On the stress exerted by a rigid body on a fixed point rigidly connected with the body, which is revolving spontaneously about the point	68-75
	J.F. Wolff	Note on Euclid, book VI, prop. 7	76
	Percival Frost	Theorem on the action of an electric current in a helix wound on a cylinder of any form upon the pole of a magnet	77-78
	Henry M. Jeffery	On the evolutes of cubic curves	78-81
	A. Cayley	Note on a relation between two circles	82-83
	A. Cayley	On the porism of the in-and-circumscribed polygon, and the (2,2) correspondence of points in a conic	83-91
	William Walton	Note on rhizic curves	91-98

	A. Cayley	On a problem of elimination	99-101
	E. J. Routh	Equilibrium of one heavy rough body on another	102-109
	E. J. Routh	Moment of inertia of a quadrilateral	109-111

	A. Cayley	On the quartic surfaces $(*)(U,V,W)^2 = 0$	111-113
	William Walton	On axes of lug and axes of kick	114-122
	Joseph Horner	On the algebra of magic squares	123-133
	Percival Frost	Electro-dynamics	134-144
	Henry M. Jeffery	On the evolute of cubic curves	145-155
	James Cockle	On the motion of fluids	156-176
	William Walton	A demonstration of a property of elliptic functions	177-178
	William Walton	A demonstration that every equation has a root	178-182
	A. Cayley	On evolutes and parallel curves	183-202
	W. H. Besant	The deduction of Euler's equations from the Lagrange's equations	203-205
	Robert Stawell Ball	The small oscillation of a particle and of a rigid body	206-209
	Joseph Wolstenholme	Note on osculating curves	210-211
	A. Cayley	Example of a special discriminant	211-213
	Joseph Horner	On the algebra of magic squares	213-224
	Henry M. Jeffery	On concyclic conicoids	225-243
	A. Cayley	On the envelope of a certain quadric surface	244-246

	A. Cayley	Tables of the binary cubic forms for the negative determinants, $\equiv 0 \pmod 4$ from - 4 to - 400; and $\equiv 1 \pmod 4$, from - 3 to - 99; and for five irregular negative	246-261

		determinants	
	William Walton	On the transformation of two simultaneous equation	262-281
	A. Cayley	Note on the calculus of logic	282-283
	A. Cayley	On the inversion of a quadric surface	283-288
	William Walton	On certain definite integrals	289-293
	A. Cayley	On the theory of the curve and torse	294-317
	R. Hoppe	Deformation of an elastic sphere pressed between two parallel planes	318-325
	William Walton	Note on sin ∞ and cos ∞	326-327
	J. W. L. Glaisher	On the summation by definite integrals of geometrical series of the second and higher orders	328-343
	A. Cayley	On a theorem relating to eight points on a conic	344-346
	R. Townsend	On the analogues in the theory of quadrics to some known properties in the theory of conics	347-362
	Benjamin Williamson	On Gauss' theorem of the measure of curvature at any point of a surface	362-366
	John Griffiths	Notes on the circle which cuts three given circles at given angles	366-372
	William Walton	On a pair of definite integrals	373-375
		Review	375-376
Vol. XII	N. M. Ferrers	Extension of Lagrange's theorem	1-5
	A. Cayley	On a theorem in elimination	5-6
	Rev. T.K. Abbott	Elementary theory of the tides	7-16
	A. Cayley	Note on the cartesian	16-19

	J. Cockle	On the motion of fluids	19-34
	A. Cayley	On the transformation of the equation of a surface to a set of chief axes	34-38

	William Walton	On the evaluation of the definite integral $\int_0^\infty$ $\frac{\chi\square-1\square\square}{1+\square}$,where $\square > 1$	39-40
	Robert Srawell Ball	A geometrical study of the kinematic, equilibrium and small oscillations of a rigid body	41- 47
	Benjamin Williamson	Conditions for a maximum or a minimum in a function of any number of variables	48-51
	J. W. L. Glaisher	On semi-convergent series	52-58
	Samuel Roberts	Note on the parallel curves of conics	58-65
	R. Townsend	On the attraction of the ellipsoid for the law of the inverse fourth power of the distance	66-85
	Henry M. Jeffery	On the principal radii of curvature of surface, referred to quadriplanar and tangential coordinates	86-111
	Robert Stawell Ball	Notes on applied mechanics	112-114
	A. Cayley	On an identical equation connected with the theory of invariants	115-118
	A. Cayley	Note on the integrals $\int_0^\infty cosx^2dx$ and $\int_0^\infty sinx^2dx$	118-126
	William Walton	On the connection between certain theorems in definite	126-129

		integrals	
	J. W. L. Glaisher	On a differential equation allied to Riccati's	129-137
	R. Townsend	On a construction in rigid dynamics	138-145
	William Walton	On the expansion of functions in trigonometrical series	146-148
	A. Cayley	On the cyclide	148-165
	J. W. L. Glaisher	Note on certain definite integrals	165-167
	William Walton	On the expression for the cosines of multiple angles in terms of powers of cosines, and conversely	168-171
	G. M. Minchin	Elementary demonstration of a fundamental theorem	172-175
	A. Cayley	On the superlines of a quadric surface five-dimensional space	176-180
	William Walton	On the evaluation of a pair of definite integrals	181-184
	William Walton	On the evaluation of the integral $\int_0^1 \frac{\square^{\square-1}-\square^{-\square}}{(1+\square)\square\square\square}\,\square\square$	184-185
	A. Cayley	A demonstration of Dupin's theorem	185-191
	William Walton	Note on one of Euler's definite integrals	192
	A. Cayley	Theorem in regard to the Hessian of a quaternary function.	193-197
	A. Cayley	Note on the (2, 2) correspondence of two variables	197-198
	Percival Frost	Mean potential over a spherical	199-200

		surface	
	R. Townsend	On a construction in the dynamics of a rigid body which rolls without sliding on a fixed rough surface	201-204
	Rev. H. W. Watson	On the motion of a particle referred to a moving space	204-213
	R. Townsend	On a property in the equilibrium of two circular cords repelling each other according to the law of the inverse cube of the distance	214
	William Walton	On the n^{th} differentiation of an integral $\int_{\square}^{\square} \phi(\square, \square)\, \square\, \square$ with regard to α, supposing α to lie between b and c.	215-220
	A. Cayley	On Wronski's theorem	221-228
	Samuel Roberts	On the order of the condition that two surfaces may touch	229-231
	J. W. L. Glaisher	On certain series for $\square$	232-239
	C. Smith	To find the foci and axes of a conic in trilinear coordinates	240-241
	Robert Moon	On the integration of the accurate equations applicable to the motion in one plane of an indefinitely thin wire	241-247
	R. Townsend	On the tautochronous and brachystochronous curves for parallel and concurrent forces	247-257
	Joseph Horner	On W. G. Horner's method of factorials	258-265
	A. Cayley	On a special quartic transformation of an elliptic function	266-269
	William Walton	On the ray-planes in biaxal crystals	269-275
	W. H. Besant	Mathematical notes	276-280

	Samuel Roberts	On the Plückerian characteristics of a curve whose equation in a resultant or a discriminant in some general cases	281-304
	J. Cockle	On singular solutions	305-318
	Rev. H. W. Watson	Curvature of curves and surfaces	318-322
	Henry M. Jeffery	On the duals of geodesics and lines of curvature on aan ellipsoid and on its pedal surfaces	322-345
	A. Cayley	Note in illustration of certain general theorems obtained by dr. Lipschitz	346-349
	A. Cayley	Extension of the planet-problem to a space of n dimensions and constant integral curvature, by dr. R. Lipschitz	349-371
	James Warren	Note on geometrical optics	371-380
Vol. XIII	R. Townsend	On tautochronous and brachystochronous curves for parallel and concurrent forces	1-13
	James Warren	The general equation of a conic expressed in terms of the radius vector and perpendicular on the tangent	14-18
	A. Cayley	On a problem of projection	19-29
	John C. Malet	A general formula for the equation whose roots are the productions in pairs of the roots of any algebraic equation	30-32
	J.D. Everett	On the kinematics of a rigid body	33-66
	William Walton	On the lateral ray-velocities in biaxis crystal	66-74
	P. Ford	On biangular coordinates	75-87

	J. Cockle	On the motion of the fluids supplementary paper	88-102
	George J. Allman	On some properties of the paraboloids	102-115
	N.M. Ferrers	On the motion of a mass of water about a moving cylinder	115-127
	A. Cayley	On the conic torus	127-129
	Henry M. Jeffery	On the conic referred to biangular coordinates	130-149
	Robert Moon	On the integration of the accurate differential equations which apply to the motion in two dimensions of an elastic solid	149-158

		On the motion of a rigid body about a fixed point	158-171
	W. D. Niven	On the rings and brushes of crystals	172-184
	Percival Frost	Zonal harmonics and electric images	184-188
	Samuel Roberts	On the quartic surface reciprocal to the surface of centres of a central conicoid	188-197
	J. P. Taylor	Geometrical proof that nine-point circle of a triangle touches the inscribed and exscribed	197
	A.G.J.Eurenius	On directrices and foci in trilinear coordinates	198-211
	A. Cayley	A geometrical illustration of the cubic transformation in elliptic functions	211-216
	R. Townsend	On the free equilibrium of a uniform cord compared with the free material particle under the action of a central force	217-238

	J. Cockle	On particular integrals	239-255
	J. W. L. Glaisher	Numerical values of certain continued fractions	255-259
	R. W. Genese	On the envelope of a straight line	260-268
	William Walton	On the vibration-cone and section-cone of equi-bifurcation in a biaxis crystal	268-278
	John C. Malet	Note on a transformation in elliptic functions	278-284
	R. Townsend	On the geometrical representation of some familiar cases of reaction in rigid dynamics	284-298
	Rev. G. F. Childe	Ray-surfaces of refraction	299-320
	A. Cayley	On the scalene transformation of a plane curve	321-330
	N. M. Ferrers	On the motion of an infinite mass of water about a moving ellipsoid	330-338
	Frederick Purser	On bitangents to the surface of centres of quadric	338-342
	J. W. L. Glaisher	On the integrals $\int_0^\infty sinx^2dx$ and $\int_0^\infty cosx^2dx$	343-349
	Henry M. Jeffery	On spherical conics described within and without a quadrangle	350-368

	A. Cayley	On an algebraical operation	369-375
	R. L. Ellis	Note on a point in dynamics	375-376
Vol. XIV	N. M. Ferrers	On the potentials of ellipsoids, ellipsoidal shells, elliptic laminæ, and elliptic rings, of variable densities	1-22

	A. Cayley	On the general equation of differences of the second order	23-25
	C. Taylor	The homographic transformation of angles	25-39
	H. Lamb	On some hydrodynamical solutions	40-43
	R. W. Genese	On the conic $\beta\gamma =$ □□□, and on a certain envelope	44-45
	A. Cayley	On the quartic surfaces represented by the equation, symmetrical determinant $\rightleftharpoons 0$	46-52
	A. Cayley	Algebraical theorem	53-63
	James Cockle	Fourth chapter on corresolvents	63-79
	J. W. L. Glaisher	Note on Sylvester's paper 'development of an idea of Eisenstein', vol. I., p. 199	79-84
	R. Townsend	On some unnoticed cases of free deduced from familiar cases of brachystochronous motion, and conversely	85-97
	R. R. Webb	The potential of an elliptic disc under the law of the inverse cube of the distance	98-103
	A. Cayley	On a quartic surface with twelve nodes	103-106
	Rev. G. F. Childe	Ray-surfaces of refraction	106-123
	A. H. Frost	On the knight's path	123-125
	R. Townsend	On the solution of a problem connected with the displacement by twist motion of a rigid body in free space	126-127
	Henry M. Jeffery	On cubics of the third class with triple foci	127-146
	James Cockle	On tests of singularity	146-167

	A. G. Greenhill	Precession and nutation	167-179

	Percival Frost	Approximation in the lunar theory	179-181
	A.G. Greenhill	Solution of the equations of motion of rigid body moveable about a fixed point under the action of no forces	182-183
	Rev. R.H.G. Day	On certain algebraic formulæ	184-185
	Chev. Faa De Bruno	Bibliographie: théorie des formes binaires	185-190
	A. Cayley	On a special surface of minimum area	190-196
	C. Niven	On compound strains	196-208
	Rev. G.F. Childe	Ray-surfaces of refraction	209-217
	Joseph Horner	On Jacobi's reduction of the second variation	218-226
	Allan Cunningham	Geometric meaning of differential equations	226-229
	A. Cayley	On a sextic torse	229-235
	A. Cayley	On a torse depending on the elliptic functions	235-241
	J. J. Walker	On the equation of the nodal plane cubic	242-245
	J. W. L. Glaisher	Theorem relating to the differentiation of a symmetrical determinant	245-248
	A. Cayley	On certain octic surfaces	249-264
	A.G. Greenhill	Solution of Euler's equations of motion by means of elliptic functions	265-271
	W. M. Hicks	Quaternion investigations on strains and fluid motion	271-292
	A. Cayley	A memoir on differential equations	292-339

	James Cockle	On linear differential equations of the third order	340-353
	A. H. Frost	A simple method of tracing paths of a knight over the squares of 5,6,7,8 and their extension to higher squares	354-359
	Henry M. Jeffery	On plane cubics with a double and single focus	359-376

	R. Harley	Supplementary Notes on a Differential Equation	41
	Thomas Muir	On Professor Cayley's Theorem regarding a Bordered Skew Symmetric Determinant	46
	C. Taylor	On Harmonically Circuminscribed Conics	50
	A. Cayley	On the Jacobian Sextic Equation	52
	A. G. Greenhill	Reduction of the Elliptic Integrals	66
	N. M. Ferrers	Property of a Quantic Curve with Three Double Points	73
	Christopher Hudson	Formulae in the Theory of Equations	74
	P. Frost	On the Twenty-seven Lines, the Fourty-five Triple Tangent Planes, and the Thirty-six Double Sixers of a Cubic Surface, with a Hint for the Construction of Models which give the position of the Lines when they are all Real	89
	N. M. Ferrers	On the Distribution of Electricity on a Bowl	97
	Thomas Muir	A List of Writings on Determinants	110
	R. W. Genese	On Biangular Coordinates	150
	A. Cayley	A Solvible Case of the Quantic Equation	154
	Henry M. Jeffery	On the Stapete Points of Class-Quartics with Quadruple Foci	158
	Thomas Muir	On New and Recently Discovered Properties of Certain Symmetric Determinants	166
	Homersham Cox	Homogeneous Coordinates in	178

		Imaginary Geometry and their Application to Systems of Forces	
	Christopher Hudson	On Equal Roots of Equation	215
	A. G. Greenhill	On the Steady Motion of a Solid of Revolution Rolling on a Surface of Revolution under Gravity	229
	A. G. Greenhill	On Functional Images in Cartesians	231
	G. H. Stuart	Reduction of Integrals of the Form	245
	T. Muir	On Circulants of Odd Order	261
	W. D. Niven	On a Method of Approximating to the Solution of Electrostatic Problems	266
	H. M. Jeffery	On Spherical Curves of the Fourth Class with Quadruple Foci	270
	R. Tucker	The Radial of an Ellipse	311
	A. R. Forsyth	On a Theorem of Jacobi's	313
	Christopher Hudson	On Equal Roots of Equations; Some Additional Results	327
	A. E. Steinthal	On the Solution of the Equation	330
	A. G. Greenhill	Functional Images in Cartesians	346
	Harry Hart	On the Circles which Cut Orthogonally the Inscribed and Escribed Circles of a Triangle	363
	William Woolsey Johnson	On the Spherical Triangle Proof of the Addition Equation in Elliptic Functions	365
	J. W. L. Glaisher	On Certain Definite Integrals Involving the Exponential-Integral	370
	J. J. Thomson	Note on (integral)	377

	Harry Hart	On the Evolute of the symmetrical Bicircular Quartic	382

Vol. XIX	A. Cayley	On Curvilinear Coordinates	1
	J. W. L. Glaisher	On certain Formulae in Elliptic Functions	22
	A. Cayley	Note on the Standard Solutions of a System of Linear Equations	38
	A. Legoux	Sur une Application d'un Determinant	41
	Henry M. Jeffery	On Spherical Cycloidal and Trochoidal Curves	44
	H. Lamb	On the Forces experienced by a Solid moving in an Infinite Mass of Liquid	66
	J. W. L. Glaisher	Expressions for arg sn a and (arg sn a)^2 as Definite Integrals	71
	Homersham Cox	On Systems of Circles and Bicircular Quartics	74
	A. R. Forsyth	Note on a Differential Equation due to Kummer	125
	Cayley	On Seminvariants	131
	A. H. Anglin	Expression for the Area of a Convex Quadrilateral when the sum of two opposite Angles is given	138
	H. T. Stearn	Note on the Energy of Strain of an Isotropic Solid	140
	J. W. L. Glaisher	Note on the Time of Descent down the Arc of a Vertical Parabola	141
	J. W. L. Glaisher	A System of Integrals involving Elliptic Functions	145
	P. A. MacMahon	On the Differential Equation	158
	Cayley	Note on the foregoing Paper	182
	W. W. Johnson	Note on the Spherical Triangle of Elliptic Functions	185
	The Acta Mathematica	Notice	189

	A. B. Basset	On the Motion of a Liquid in and about Cylinders whose Transverse Sections are the Inverse of Confocal Ellipses with respect to their Centres	190
	J. W. L. Glaisher	Note on the Compositions of a Number as a sum of Two and Four Uneven Squares	212
	J. W. L. Glaisher	Theorems relating to the Sum of the Uneven Divisors of a Number	216
	Cayley	On Mr. Anglin's Formula for the snccessive Powers of the Root of an Algebraical Equation	223
	A. G. Greenhill	A revision of Chapters XXIV. and XXVI. of Legendre's Fonctions Elliptiques	225
	Percival Frost	On certain Definite Integrals connected with Spherical Harmonics	242
	A. Lodge	On the Solution of the General Equation of the Fourth Degree	257
	E. J. Routh	A Method of expressing any particular Arbitrary Constant in the Solution of Linear Differential Equations in Terms of the Initial Conditions	262
	A. R. Forsyth	On Linear Differential Equations: in particular that satisfied by the series	292
	P. A. MacMahon	On Professor Cayley's Canonical Form	337
	R. Tucker	The "Triplicate-Ratio" Circle	342
	A. B. Basset	On certain Physical Problems connected with Surfaces which are the Inverses of	349

		Ellipsoids of Revolution	
	Rink	On some Abelian Integrals	374
	J. Larmor	On Lines of Striction	381
Vol. XX	A. Legoux	Sur una famille de surfaces algebriques: considerations sur les surfaces orthogonales et homofocales	1
	J. W. Warren	A general theorem concerning the motion of a solid body	13
	G. H. Stuart	Complex multiplication of elliptic functions	18
	R. Tucker	A group of circles	57
	Karl Pearson	On the motion of spherical and ellipsoidal bodies in fluid media (Part I)	60
	J. W. L. Glaisher	On the representations of a number as the sum of four uneven squares, and as the sum of two even and two uneven squares	80
	J. W. L. Glaisher	On the function x(n)	97
	R. Tucker	The symmedian-point axis of an associated system of triangles	167
	J. W. Warren	Corollaries from the differential equations of spherical trigonometry	170
	Robert Russell	On differential equations which belong to the class	179
	Karl Pearson	On the motion of spherical and ellipsoidal bodies in fluid media (Part II)	184
	Cayley	On a theorem relating to seminvariants	212
	Cayley	On the orthomorphosis of the circle into the parabola	213
	G. H. Stuart	Complex multiplication of elliptic functions.	221

		Summary-continued from p. 56	
	A. B. Basset	On the motion of a liquid in and about certain quartic and other cylinders	234
	C. V. Coates	Bassel's functions of second order	250
	J. Larmor	On hydro-kinetic symmetry	261
	Robert Russell	On the differential equation	265
	W. Booth	Note on Sylvester's canonical form of binary quantics of the degree 2n-1	270
	Henry M. Jeffery	On plane curves of the fourth class with a triple and a single focus	273
	J. J. Sylvester	On the trinomial unilateral quadratic equation in matrices of the second order	305
	J. W. L. Glaisher	On the quantities K, E, J, G, K', E', J', G' in elliptic functions	313
	P. A. MacMahon	Operators in the theory of seminvariants	362
	P. A. MacMahon	A new theorem in symmetric functions	365
	Samuel Roberts	Note on the divisors of numbers and products of factors	370
	Robert Russell	A transformation in elliptic integrals and its application to spherical trigonometry	378
Vol. XXI	Cayley	On the theory of seminvariants	92
	T. Muir	A supplementary list of writings on determinants	299
	P. A. MacMahon	Certain special partitions of numbers	367
	R. Russell	On a Theorem in Higher Algebra	373
	R. Lachlan	On the properties of a triangle formed by coplanar circles	1

	M. Jenkins	On some geometrical proofs of theorems connected with the inscription of a triangle of constant form in a given triangle	84
	R. J. Dallas	Note on projection applied to problems and to Solid Geometry	89
	H. M. Jeffery	On the foci of spherical curves of the fourth order	130
	W. W. Johnson	A geometrical representation of alternants of the third order and of their quotients when divided by A (0,1,2)	217
	A. Larmor	On the geometrical theory of perspective	339
	A. R. Forsyth	Note on a quasi-stereographic projection due to Gauss	376
	C. V. Coates	Bessel's functions of the second order (second paper)	183
	H. W. Watson	On a theorem in integration	225
	Cayley	On the invariants of a linear differential equation	257
	E. J. Routh	Some theorems in integration	281
	Cayley	On linear differential equations	321
	Cayley	On linear differential equations (the theory of decomposition)	331
	J. W. L. Glaisher	On the coefficients in the q-series for	60
	Cayley	A verification in regard to the linear transformation of the theta-functions	77
	Cayley	On the transformation of the double-theta functions	142
	A. Mukhopadhyay	A note on elliptic functions	212
	A. R. Forsyth	Some doubly-infinite converging series	261

	E. G. Gallop	The distribution of electricity on the circular disc and spherical bowl	229
	A. B. Basset	On the motion, in an infinite liquid, of a cylinder whose cross-section is the inverse of an ellipse with respect to its centre	336
	C. Chree	Two or more distinct elastic solid media in contact separated by parallel planes, exposed to purely surface forces, specially when normal. Complete solution of an elastic solid continuously varying with the depth but of constant rigidity	170
	E. J. Routh	A note on geometrical optics	179
	C. Chree	Solid sphere of spherical shell of varying elasticity under purely normal surface forces	193
	C. Chree	Longitudinal vibrations of a circular bar	287
		Notice of a Mathematical Prize	209
Vol. XXII	P. A. MacMahon	The law of symmetry and other theorems in symmetric functions	74
	Cayley	On multiple algebra	270
	M. Gino Loria	Remarques sur la geometrie analytique des cercles du plan et sur son application a' la theorie des courbes bicirculaires du 4 ordre	44
	A. R. Johnson	Extension of Cayley's differential equation for orthogonal surfaces	81
	C. M. Jessop	The mechanical tracing of curves	151

	Cayley	On Rudio's inverse centro-surface	156
	A. R. Johnson	On self-conjugate polygons and polyhedra	158
	A. S. Hart	Note on a system of cubic curves	199
	A. R. Johnson	Symmetric products in relation to curves and surfaces	325
	W. P. Workman	The theory of the singular solutions of integrable differential equations of the first order	175 (Part I) 308 (Part II)
	A. C. Dixon	On Abel's theorem	200
	James Cockle	Second addendum on the relations of certain symbols	270
	A. R. Forsyth	On Weierstrass's doubly-periodic functions	1
	A. G. Greenhill	Complex multiplication of elliptic functions	119
		With additional note	174
	R. A. Herman	On the motion of two spheres in fluid, and allied problems	204
	H. J. Sharpe	Motion of compound bodies through liquid	262
	R. A. Herman	On a problem in fluid motion	370
	C. Chree	A new solution of the equations of an isotropic elastic solid, and its application to the theory of beams	89
	W. Walton	On a physical property of a certain generator of the wave-surface of a biaxis crystal	268
Vol. XXIII	A. R. Forsyth	Systems of reduced simultaneous ternary forms equivalent to a given ternary form, which involves several sets of variables	102
	P. A. MacMahon	The eliminant of two binary quantics	139
	Cayley	The investigation by Wallis of his expression for $\prod$	165

	A. Berry	Simultaneous reciprocants	260
	Cayley	A theorem on trees	376
	H. W. Richmond	A symmetrical system of equations of the lines of a cubic surface which has a conical point	170
	H. M. Jeffery	On the circles, which are described about the four circles, escribed and inscribed in a given plane triangle, taken by triads	180
	H. M. Jeffery	On the circles, which may be described about the eight small circles of a sphere, taken by triads, which are inscribed in the triangles formed by three planes intersecting in the centre	198
	A. C. Dixon	On twisted cubics which fulfil certain given conditions	343
	H. M. Jeffery	On the generalised problem of contacts	358
	C. M. Jessop	A property of bicircular quartics	369
	James Cockle	On synthetical solution and on deformation	1
	A. R. Forsyth	On the theory of forms in the integration of linear differential equations of the second order	45
	W. F. Sheppard	On some expressions of a function of a single variable in terms of Bessel's functions	223
	E. J. Routh	On a theorem of Jacobi in dynamics	34
	A. N. Whitehead	On the motion of viscous incompressible fluids	78
	J. Larmor	Electro-magnetic and other images in spheres and planes	94

	A. N. Whitehead	Second approximations to viscous fluid motion	143
	A. E. H. Love	On the motion of a liquid elliptic cylinder under its own attraction	153
	A. E. H. Love	The oscillations of a mass of gravitating liquid in the form of an elliptic cylinder which rotates as if rigid about its axis	159
	R. A. Herman	Equations of the stream lines due to the motion of an ellipsoid in perfect and in viscous fluid	378
	w. Walton	On the coincidence of ray-directions in a biaxis crystal which correspond to certain conjugate planes of polarization	7
	C. Chree	Further applications of a new solution of the equations of an isotropic elastic solid, mainly to various cases of rotating bodies	11
	C. Chree	On longitudinal vibrations	317
Vol. XXIV	H. F. Baker	Weierstrass formulae applied to the binary quartic and ternary cubic	1
	E. H. Askwith	On possible groups of substitutions that can be formed with three, four, five, six, and seven letters respectively	111
	E. C. Hudson	On the expansion of a series	233
	E. H. Askwith	On groups of substitutions that can be formed with eight letters	263
	A. C. Dixon	On twisted cubics	30
	H. M. Taylor	On the centre of an algebraical curve	55

	H. M. Jeffery	On the identity of the nodes of a nodal curve of the fourth order with those of its quartic and sextic contravariants	250
	E. J. Routh	Note on the intersection of a curve with a straight line	257
	P. J. Heawood	Map-colour theorem	332
	H. F. Baker	On the centre of an algebraical curve	338
	Frank Morley	On the kinematics of a triangle of constant shape but varying size (with note, p. 386)	359
	A. C. Dixon	On the doubly periodic functions arising out of the curve	167
	P. A. MacMahon	A theorem in the calculus of linear partial differential equations	246
	Cayley	A transformation in elliptic functions	259
	M. T. J. Stieltjes	Sur quelques integrales definies et leur developpement en fractions continues	370
	H. J. Sharpe	Note on Legendre's coefficients	383
	Karl Pearson	Memoir on the flexure of heavy beams subjected to continuous systems of load	63
	C. Chree	On the longitudinal vibrations of aeolotropic bars with one axis of material symmetry	340
Vol. XXV	Cayley	On the substitution groups for two, three, four, five, six, seven and eight letters	71, 137
	G. B. Mathews	On the classification of symmetric functions	127
